**DETAILED ACTION**

1. Claims 1-4 are pending in this application.

***Election/Restrictions***

2. The restriction requirement is removed at this time since according to Applicant's arguments the independent claims recite steps in the same process.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Nakagawa (US Patent 5,885,755).

Nakagawa teaches in figures 2a-2g and column 3, line 55 to column 4, line 52, the claimed process. A pattern-irradiated photoresist layer, on a spin chuck, has a washing liquid applied as a pretreatment for development.

Art Unit: 1756

A film is formed upon which the developer is applied. After the developer has completely replaced the film, more developer is applied followed by a rinse of pure water.

5. Claims 2-4 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Shibata (EP 0 794 463).

Shibata teaches a puddle development process whereby after the puddle is formed, additional developer is supplied. The developer is followed by a rinse liquid.
